Introduction to Online Medical Prescription Application(Med Scribe Pro)

The goal of this application is to plan and implement an online application that allows Doctors, Patients, and Pharmacist to share important medical information via secure online databases. Our main goal is to manage medical prescriptions by allowing Doctors to write digital prescriptions assigned to a patient and Pharmacists to read the prescription of a particular patient. There will be three distinct user groups in this system (Doctors, Pharmacists, and Patient) each of which will have its own features and user interface.

The Doctors Group will have the following features:

- Allow Doctors to write Digital Prescriptions that are linked to a Patient ID.
- Allow Doctors to view and add to a Patients Electronic Medical Record (EMR).
- Allow Doctors to attach documents to a Patient's EMR. (X-Rays, Cat Scans, etc.)

The Pharmacist Group will have the following features:

- Allow Pharmacists to read Digital Prescriptions based on a Patient ID.
- Allow Pharmacists to see all medications a Patient is currently on. (If a bad combination is found it can be flagged)
- Allow Pharmacists to attach notes to a prescription.
- Send Automated Emails to Patients containing Medical Instructions about medications they have been prescribed (also attach any Pharmacists notes).

The Patient Group will have the following features:

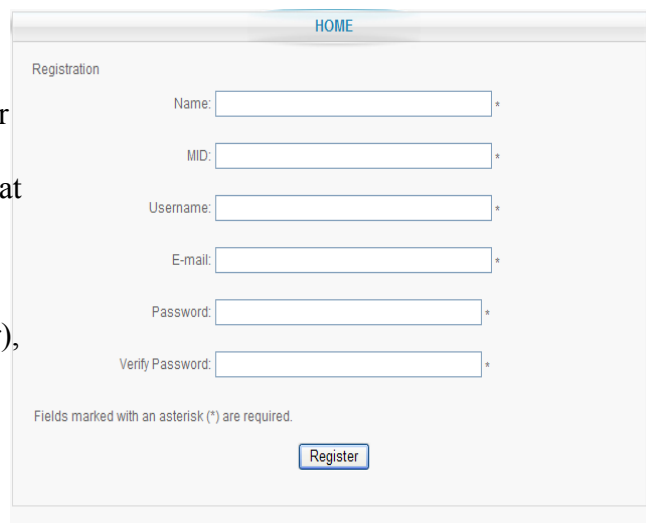

- Allow Patients to update their personal information.
- Allow Patients to read and print their Electronic Medical Records (EMR).
- Allow Patients to access information about medications they've been prescribed.
- Allow Patients to give Doctors access to their Electronic Medical Records (EMR).

Patient

Patient is a person who receives medical care, treatment, or care by one or more doctors.

- Registration

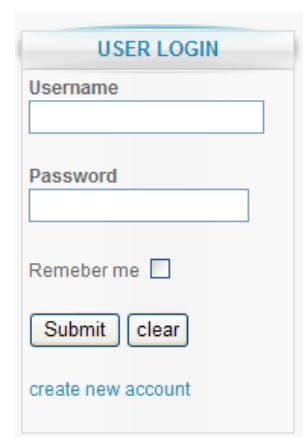

In order to register will need a valid email address and medical identification number (MID). The MID is an identification number that is assigned to a patient. Also the patient has to have “Name”, “Username” (created by the user), and “Password” (created by the user). After registering you will receive a validation email.

In order to activate your account, you must follow the link provided in the verification email.

- Log In

After you have registered with Med Scribe Pro you should log into the system using the login form located on the home page at <http://www.medscribepro.com>. You should also be able to request and recover your username and/or password.

- Front End

You can access to all of the features available for the patient group. The patient front end features should include the following sections:

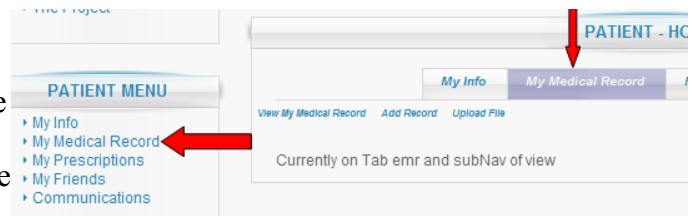

- [My Info](#)
You can change and add your Basic information and your contact number. Also you can provide and include your General Health Information.

It is very important to enter the correct information in this page to get the correct health care that you need. Note that both Doctors and Pharmacists can access your General Health Information.

○ [My Medical Record](#)

On this section you will be able to Browse through your records by date range, Doctor, Location, or viewing your entire file. Also you will be able to print your medical records.

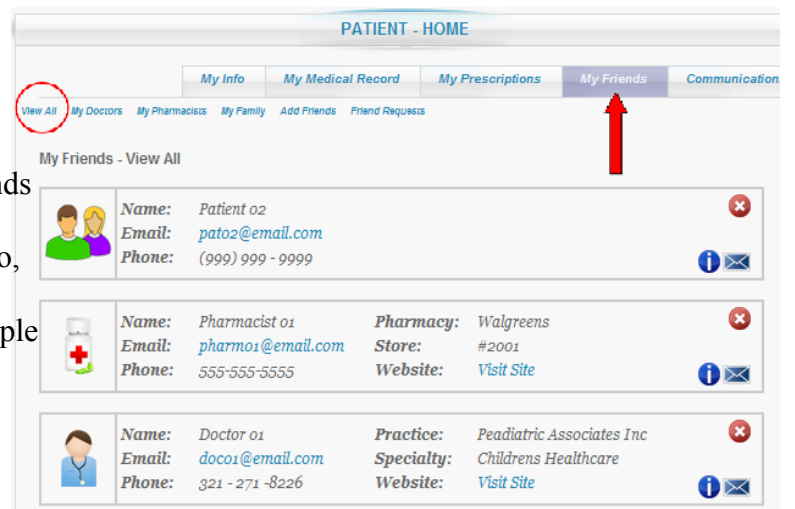

○ [My Prescriptions](#)

On this section you will be able to view all medications they have been prescribed to you and information about those medications such as instructions and notes. Also, you can find all the information about prescribed medications such as the name of the medication, the prescribed date, Doctors Instructions, medical directions, and the refills remaining

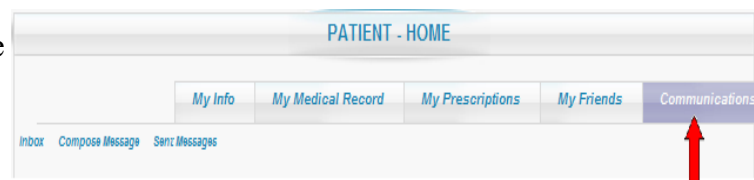

○ [My Friends](#)

On this section you can add, delete and view all your friends you can view al your doctors or your pharmacists. You also, have the basic information about your friends. For example if you have a doctor you can now what is his/her specialty filed or if your friend is a pharmacist you can know his store name and the store number. You can find all the other basic information that you might need such as phone number and Email address. Also, you can search for a new Friend by the name or the MID.

○ [Communications](#)

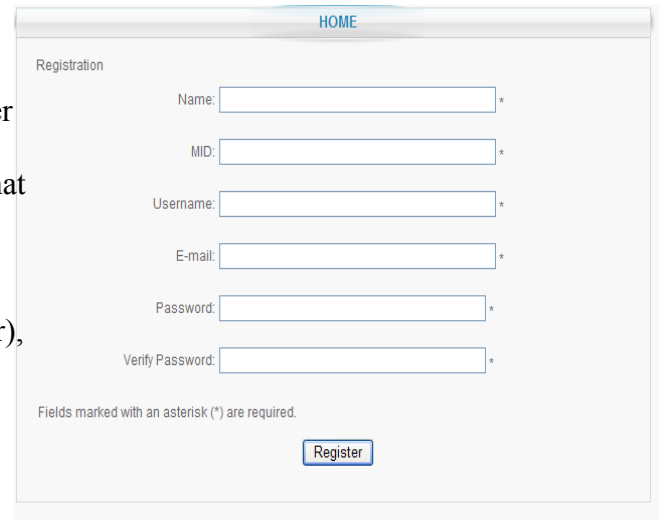

You will be able to communicate with other pharmacists, patients, and doctors via this integrated message system or Email.
